OLAIN

ORACLE LAB AI NETWORK TOKEN

EXECUTIVE SUMMARY

OLAIN ORACLE LAB AI NETWORK Token is a **product-driven, deflationary token** designed to align long-term incentives between users, contributors, and investors.

Instead of relying on short-term launch hype, the protocol is structured around real subscription revenue, reserve-backed incentives, transparent governance, and disciplined supply management.

THE MODEL COMBINES:

50% Product & Subscription Reserve

Subscription revenue, rewards, cashback, and value-based settlement funding.

11% Ecosystem Growth Reserve

Program funding, partnerships, and scaling.

12% Liquidity

DEX/CEX market depth and trading stability.

Transparent Treasury

Time-locked governance preventing dumps.

Institutional Grade

Multi-sig controls, public audits, CEX-ready structure.

TOKEN RESERVE ALLOCATION

50%	Product & Subscription Reserve
11%	Ecosystem Growth Reserve
12%	DEX/CEX Liquidity
4%	Treasury Reserve
6%	Strategic Partners
6%	Core Team
5%	Airdrop/Community
4%	Marketing
2%	Advisors

CORE LOOP

PRODUCT USAGE

Real utility drives demand

REVENUE

Subscription & service revenue

BURN

Deflationary supply model

SUPPLY SCARCITY

Reduced supply, increased value

VALUE APPRECIATION

Stronger token fundamentals

STRONGER REWARDS

Better incentives for all

BROADER ADOPTION

More users, more growth

TIMELINE CONVENTION

Month 0 = TGE

The airdrop cliff begins after listing

10% of locked value is released every 4 months for **10 releases**, completing at **Month 42**.

1. INSTITUTIONAL COMPLIANCE & TRANSPARENCY

COMPLIANCE FRAMEWORK

REQUIREMENT	STATUS	DETAILS
 Security Audit	 Scheduled	Top-tier firm (Certik/OpenZeppelin)
 AML/KYC	 Ready	CEX listing requirements met
 Treasury Controls	 Multi-sig	3-of-5 governance approval required
 Token Standard	 BEP-20	BNB Chain-native token standard
 Transparency	 Full	On-chain verification, public dashboard

ON-CHAIN VERIFICATION & TRACKING

BURN VERIFICATION

On-chain tx hash + permanent audit trail

TREASURY DASHBOARD

Live public viewer (www.olain.net/treasury)

GOVERNOR DIRECTORY

Public list of elected governors + voting history

FINANCIAL REPORTING

Quarterly transparent reports to community

MULTI-SIG CONTROLS

3-of-5 team approval for all major movements

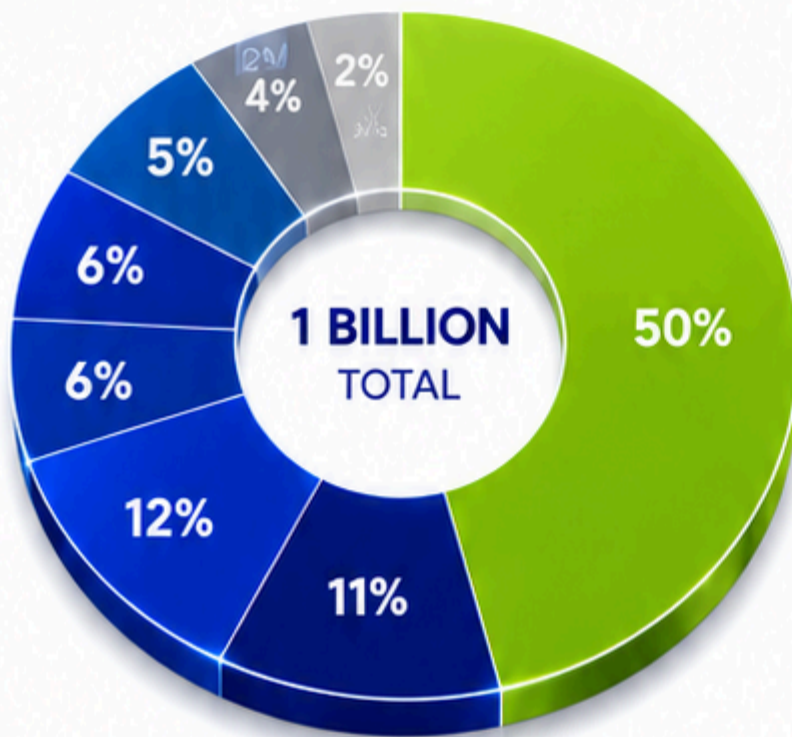

Transparency. Security. Trust.
Built for the long term. Backed by real value.

2. COMPLETE

TOKEN ALLOCATION

1 BILLION TOTAL

ALLOCATION DESIGNED FOR SUSTAINABLE GROWTH

Long-term ecosystem stability and security

Incentive alignment for all stakeholders

Transparent, verifiable and community-first distribution model

CATEGORY	%	AMOUNT (TOKENS)	PURPOSE	LOCK/VESTING
 Product & Subscription Reserve	50%	500M	Subscription-backed rewards, cashback, incentives, and value-based settlement funding	Reserve-backed distribution
 Ecosystem Growth Reserve	11%	110M	Dev grants, expansion, partners	Governance-locked
 DEX/CEX Liquidity	12%	120M	Trading depth, market-making	5-year LP lock + 6m min
 Treasury Reserve	4%	40M	Strategic optionality & risk management	24m lock, then voting
 Strategic Partners	6%	60M	Ecosystem partnerships	18m linear + KPIs
 Core Team	6%	60M	Founding team	12m cliff + 36m linear
 Airdrop/Community	5%	50M	100-day phase-wise campaign allocations, community activation, value-lock settlement	100% burn at listing; 6-month cliff; 10% of locked value released every 4 months for 10 releases until full delivery (42 months total) from reserve-backed release contract
 Marketing	4%	40M	Growth & adoption	10% TGE + 36m linear
 Advisors	2%	20M	Domain expertise	Quarterly over 24 months

KEY HIGHLIGHTS

DEFLATIONARY

Revenue-backed burn model drives scarcity & value.

TRANSPARENT

On-chain verifiable allocations & vesting.

SUSTAINABLE

Built for long-term ecosystem growth & adoption.

SECURE

Multi-sig treasury & governance protection.

Transparency. Security. Trust. Built for the long term. Backed by real value.

www.olain.net

3. ALLOCATION DETAILS

50% PRODUCT & SUBSCRIPTION DISTRIBUTION RESERVE

(500M OLAIN ORACLE LAB AI NETWORK)

ALLOCATION PURPOSE & RELEASE MECHANISM:

This 500M OLAIN ORACLE LAB AI NETWORK allocation functions as the protocol's **Product & Subscription Distribution Reserve**.

It is not released as a standard linear vesting pool; instead, it funds subscription rewards, cashback, staking incentives, community rewards, and value-based airdrop settlements over time.

CAMPAIGN ALIGNMENT

1 Campaign allocations are recorded as locked value at listing using the official listing price, and the original allocated tokens are then **permanently burned**.

2 4-month settlements are funded from the **reserve-backed release contract** using the participant's locked value and the live DEX market price.

3 The reserve backs future obligations while the original campaign allocation remains **permanently removed from circulation**.

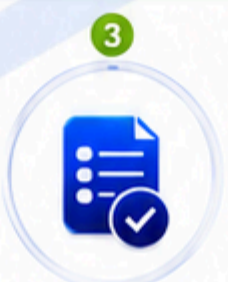

REVENUE FLOW

1 Subscription revenue enters the ecosystem.

2 A portion supports liquidity growth, protocol sustainability, and reserve-backed distributions.

3 Reserve-funded settlements are executed automatically through smart contracts.

4 Any unclaimed or unused allocation is **permanently burned**.

DEFLATIONARY DESIGN

1 Campaign tokens are **burned at listing** after the locked value is recorded.

2 Future settlements are funded from the **reserve-backed release contract**, not from burned campaign allocation.

3 This **reduces sell pressure**, protects circulating supply, and aligns rewards with real product usage and ecosystem growth.

4 Builds a sustainable, transparent, and **community-first** economic model.

Backed by Real Value.
Designed for Long-Term Growth.

www.olain.net

3. ALLOCATION DETAILS

The project follows a **dual allocation model**. The token supply allocation ensures ecosystem growth and long-term value creation, while the operational fund allocation is funded through separate revenue channels to ensure **sustainability and transparency**.

OPERATIONAL FUND ALLOCATION (SEPARATE REVENUE):

Operational expenses are funded through separate revenue channels:

CATEGORY	%	PURPOSE
 LP for DEX	50%	Creating Sustainable Ecosystem Value, Loyalty Rewards & Subscription Value Back
 Future DEX & CEX Reserve	20%	Exchange listings & institutional liquidity
 Liquidity Pool Growth	20%	DEX expansion & market stability
 Operations	10%	Team, infrastructure, compliance, development

LONG-TERM BENEFITS:

-  **CONTINUOUS DEFLATION**
Scarcity increases over time.  
-  **REDUCED CIRCULATING SUPPLY**
Less tokens in market.  
-  **REAL MARKET BUY PRESSURE**
Revenue-driven, not speculation.  
-  **INCREASED SCARCITY**
Deflationary economics.  
-  **SUSTAINABLE ECOSYSTEM GROWTH**
Revenue-backed, not unsustainable emission.  

INVESTOR FAQ:

- Q:** If reward pool tokens are continuously burned, what happens to future staking rewards?
- A:** The reward allocation is dynamic and designed for long-term sustainability. Airdrop allocations are permanently retired at listing, future 4-month settlements are funded by the **reserve-backed release contract**, which continues to support staking rewards, loyalty programs, community incentives, and ecosystem growth. Future burn rates may also be adjusted through DAO governance proposals.

Backed by Real Value.
Designed for Long-Term Growth.

www.olain.net

INVESTOR PROTECTIONS & TRUST MEASURES

To attract and protect large investors (whales) and institutional partners, OLAIN ORACLE LAB AI NETWORK commits to the following **measurable, on-chain, and auditable protections**.

01

VERIFIED CONTRACTS & FULL DISCLOSURE

All token and protocol contracts will be deployed with verified source code published on BscScan. Contract addresses, ABI, and bytecode hashes will be listed on the public treasury dashboard.

02

THIRD-PARTY AUDIT COMMITMENT

An independent security audit (CertiK / OpenZeppelin / similar) will be completed and published prior to major CEX listings; audit issues will be remediated and the final report posted publicly.

03

GNOSIS SAFE MULTISIG + TIMELOCK

All treasury and critical admin functions will be controlled by a Gnosis Safe multisig (recommended 5 owners, 3-of-5 threshold) and a TimelockController with a 48-72 hour delay for governance-executed actions.

04

ON-CHAIN VESTING & TRANSPARENCY

All vesting schedules (team, advisors, partners) will use on-chain vesting contracts (VestingWallet or equivalent). Per-address vesting state will be exposed in the public dashboard so investors can verify vested vs. locked tokens.

05

TWAP BUYBACKS & DAILY CAPS

Revenue-driven buybacks will be executed as TWAP operations (time-weighted swaps) or via decentralized keepers to minimize slippage. Daily buyback and allocation-release caps will be enforced and published (example cap: 0.01% of total supply per day, adjustable by DAO governance).

06

PROOF-OF-RESERVES & LP LOCKS

Treasury balances and LP ownership will be attested by an auditor and published as Merkle proofs. LP tokens will be locked in reputable lockers (Unicrypt / TeamFinance) with public verification links.

07

AUDIT TRAIL & DASHBOARD

Every buyback, burn, vesting unlock, and treasury movement will publish the transaction hash and a human-readable explanation to the public dashboard and on-chain event logs.

08

LEGAL & KYC PATH FOR INSTITUTIONS

Institutional OTC or strategic investments will be supported via KYC/AML workflows and optional escrow/custodian arrangements to meet compliance needs.

These measures are designed to **reduce single-entity control risk**, **prove treasury integrity**, and **minimize market-impact** for large buys — all core requirements for institutional participation.

	EXAMPLE PARTNERS	Series A/B investors, ecosystem expansion partners

GOVERNANCE & PERFORMANCE FRAMEWORK

VOTING POWER SCALING

KPI achievement directly impacts voting multiplier
(0.5x - 2x baseline based on quarterly reviews)

PARTNERSHIP COUNCIL

Strategic partners form advisory council on
exchange listings, institutional partnerships,
and cross-chain initiatives

KPI TRACKING

Quarterly reviews align token vesting with
deliverables (user milestones, integrations,
partnerships)

UNDERPERFORMANCE

Community governance vote can pause vesting,
reduce voting power, or trigger partnership exit

EXIT MECHANISM

Partner non-performance after 2 consecutive
missed KPIs allows community decision to
reallocate remaining tokens

Aligned incentives.
Performance-driven partnerships.
Stronger ecosystem. **Shared success.**

www.olain.net

6% CORE TEAM

(60M OLAIN ORACLE LAB AI NETWORK)

OVERVIEW

The Oracle Core Team is not a traditional group of anonymous founders receiving free tokens. It is the **Global 300** — a merit-based, globally distributed acceleration army of 300 elite operators.

ENTRY REQUIREMENT

To secure a seat, each member must lock a non-refundable Trust Bond totaling over **\$1.2 Million USD** into the OLAIN ORACLE LAB AI NETWORK Treasury. These funds are directly locked in **DEX liquidity** to strengthen the liquidity pool.

GLOBAL 300 STRUCTURE

TIER	ROLE	MEMBERS	TRUST BOND (USD)	OLAIN ALLOCATION EACH
3	CHAMPIONS	200	\$2,000	100,000 OLAIN ORACLE LAB AI NETWORK
2	DIRECTORS	70	\$5,715	~285,714 OLAIN ORACLE LAB AI NETWORK
1	COUNCIL	30	\$13,333	~666,666 OLAIN ORACLE LAB AI NETWORK
	TOTAL	300	~\$1.2 MILLION LOCKED	60,000,000 OLAIN ORACLE LAB AI NETWORK ALLOCATED

VESTING

12-month cliff
↓
36-month
linear unlock

FIRST UNLOCK

After the 12-month cliff ends, the first unlock begins in **Month 13**, subject to the monthly 4.35% vesting condition.

ACCOUNTABILITY & UNLOCK RULE

From Month 13 onward, members may receive their monthly 4.35% release only if they maintain the required weekly maintenance standard:

- Champions = 2 weeks
- Directors = 3 weeks
- Council = 4 weeks

DEFLATIONARY CONSEQUENCE

If a member fails to meet the required weekly hustle metrics, the unvested 4.35% allocation is permanently **burned** and sent to a dead wallet, reducing circulating supply and benefiting all token holders.

OPERATIONAL MANDATE

CHAMPIONS

Responsible for digital visibility, daily social media amplification, and mandatory tagging of Oracle Lab.

DIRECTORS

Responsible for acceleration, bi-weekly Zoom presentations, and driving subscriptions for VeriVault and OraMind.

COUNCIL

Responsible for global expansion, monthly awareness programs, and opening new market pockets worldwide.

ACCOUNTABILITY RULE

Weekly execution is the core requirement for continued vesting; failure to maintain the assigned standard leads to **permanent burn** of the unvested allocation.

ANTI-DUMP PROTECTION (TIME-DECAY SELL TAX)

If a member sells unlocked tokens during the early vesting period, a time-decay sell tax is applied. The tax applies only before the full vesting period ends, and **100%** of all collected tax is **permanently burned**.

PERIOD	MONTH 1	MONTH 2	MONTH 3	MONTH 4	MONTH 5	MONTHS 6 – 16 (MONTHLY DECAY)	MONTH 18+
SELL TAX	75%	65%	45%	25%	15%	14% down to 1% monthly	0%

 **100% OF ALL COLLECTED TAX IS PERMANENTLY BURNED.**

Global 300. Global Impact. Global Accountability.
Build. Execute. Transform. Together.

www.olain.net

5% AIRDROP

(50M OLAIN ORACLE LAB AI NETWORK)

FINAL AIRDROP RULE

Unlike traditional airdrops that create immediate sell pressure through upfront token distribution, this mechanism is designed to reward genuine participation while preserving market stability.

During the 100-day phase-wise campaign, eligible participants receive their allocation based on subscription amount, campaign phase, and reward multiplier. At the official listing event, the allocated tokens are converted into a permanent Locked Value using the official listing price, the original allocated tokens are **permanently burned**, and settlement begins **6 months after listing** with **10%** of the locked value released **every 4 months for 10 releases** until full delivery over 42 months. Each release is paid from the reserve-backed release contract using the live DEX market price at the time of settlement.

5% AIRDROP

(50M OLAIN ORACLE LAB AI NETWORK)

A fair, transparent & reward-driven campaign that protects ecosystem stability and ensures long-term value delivery for all genuine participants.

CAMPAIGN MECHANICS

Registration

Real-time registration through the OLAIN ORACLE LAB AI NETWORK wallet/dApp. Smart contract automatically records participant details and timestamps during subscription.

Reward Calculation

OLAIN ORACLE LAB AI NETWORK Allocation = (Subscription USD ÷ Phase Token Price) × Reward Multiplier. Upon listing, this allocation is converted into permanent locked value at the official listing price and the original allocated tokens are **burned**.

Dashboard Allocation

Allocated OLAIN ORACLE LAB AI NETWORK is instantly displayed on the participant dashboard as a **locked, non-transferable** campaign allocation, with the final entitlement represented by recorded locked value rather than transferable token balance.

Daily Allocation Caps

Phase 1: 1M/day for 10 days (10M) • Phase 4: 0.3M/day for 25 days (7.5M)
Phase 2: 0.6M/day for 25 days (15M) • Phase 5: 0.33M/day for 15 days (5M)
Phase 3: 0.5M/day for 25 days (12.5M)
Total = 50M

On-Chain Transparency

Every allocation is permanently recorded on-chain with a verifiable audit trail.

100-DAY PHASE BREAKDOWN

PHASE	DURATION	DAYS	MULTIPLIER	TOKEN PRICE (USD)	DAILY CAP	MOTIVATION
 PHASE 1 EARLY BIRD	Early Bird	1 – 10	100%	\$0.01	1M / Day	10M total allocation for earliest adopters

LISTING VALUE LOCK, BURN & SETTLEMENT MECHANISM

The campaign is designed around a **Value-Based Settlement Model** rather than a traditional token vesting model.

STEP 1

CAMPAIGN ALLOCATION

During the 100-day campaign, eligible participants receive their OLAIN ORACLE LAB AI NETWORK allocation based on subscription amount, campaign phase, and reward multiplier.

These allocations are visible on the dashboard but remain **locked** and **non-transferable** until listing.

CAMPAIGN PERIOD (100 DAYS)

SUBSCRIPTION & ELIGIBILITY

ALLOCATION CALCULATION

DASHBOARD (LOCKED)

STEP 2

LISTING VALUE RECORDING

At the official PancakeSwap listing, each participant's allocated campaign tokens are converted into a permanent Locked Value using the official listing price of **\$0.06**.

The on-chain record reflects that **locked value**, not the original token quantity.

LISTING DAY (PANCAKESWAP)

OFFICIAL LISTING

\$0.06
LISTING PRICE

LOCKED VALUE
RECORDED ON-CHAIN

STEP 3

PERMANENT CAMPAIGN BURN

Immediately after the Locked Value is recorded on-chain:

- ✓ The entire campaign allocation is **permanently burned**.
- ✓ All campaign-distributed OLAIN ORACLE LAB AI NETWORK tokens are removed from circulation.
- ✓ The original campaign allocation never re-enters supply.

Only the recorded **Locked Value** remains in the protocol.

IMMEDIATE BURN

CAMPAIGN ALLOCATION (TOKENS)

PERMANENT
BURN

REMOVED FROM
CIRCULATION

STEP 4

VALUE-BASED SETTLEMENT

After the 6-month cliff, token releases begin. The smart contract releases **10%** of the participant's Locked Value every 4 months for **10 releases**, completing full delivery by Month 42.

Each release uses the participant's recorded locked value, the fixed release percentage, and the live DEX market price.

SETTLEMENT SCHEDULE

6 MONTHS
CLIFF

10%

EVERY
4 MONTHS

10
RELEASES

This means:

- ↑ Higher market price → fewer tokens released.
- ↓ Lower market price → more tokens released.

The participant receives the **same scheduled value**, not a fixed token amount.

STEP 5

SETTLEMENT SOURCE

Releases every 4 months are funded from the protocol's Product & Subscription Distribution Reserve (**50% of Total Supply**) through the reserve-backed release contract.

FUNDING SOURCE

50%

(50M OLAIN ORACLE LAB AI NETWORK)

VESTING & LOCK SCHEDULE

LISTING VALUE CONVERSION

At PancakeSwap listing, every eligible wallet's campaign allocation is converted into a permanent locked value using the official listing price of **\$0.06**.

PERMANENT BURN

Immediately after the locked value is recorded on-chain, the original campaign-distributed tokens are **permanently burned** and removed from circulation.

INITIAL CLIFF

No release occurs during the first **6 months** after listing, preventing immediate sell pressure and preserving market stability.

4-MONTH RELEASE CYCLE

After the cliff, **10%** of the participant's locked value is released every **4 months** for **10 releases**, completing the full delivery by Month 42.

RELEASE SEQUENCE

The scheduled release months are **Month 6, 10, 14, 18, 22, 26, 30, 34, 38, and 42**. Using a listing date of **11 November 2026**, the first release falls on **11 May 2027** and the final release falls on **11 May 2030**.

MARKET-BASED CONVERSION

On every release date, the smart contract calculates the token quantity using the **live DEX market price**, meaning the number of tokens may vary while the delivered value remains consistent.

EXAMPLE

If a participant's locked value is **\$6,000**, each release equals **\$600**. If the token is trading at **\$10**, the participant receives **60 OLAIN ORACLE LAB AI NETWORK**; if it is trading at **\$1**, the participant receives **600 OLAIN ORACLE LAB AI NETWORK**.

IMMUTABLE RULES

The settlement formula, percentages, cliff period, and release cadence are **permanently defined** in the smart contract and cannot be modified after launch.

VESTING RELEASE SCHEDULE (10% EVERY 4 MONTHS)

RELEASE NUMBER	SCHEDULED MONTH	MONTH COUNT FROM LISTING	EXPECTED RELEASE DATE* (Based on 11 Nov 2026)	PERCENTAGE OF LOCKED VALUE	CUMULATIVE RELEASE

(50M OLAIN ORACLE LAB AI NETWORK)

ANTI-DUMP BENEFITS

This structure provides several long-term stability benefits:

- ✓ Eliminates immediate sell pressure after listing.
- ✓ Prevents whale dumping from campaign participants.
- ✓ Permanently removes the original campaign allocation from circulation.
- ✓ Aligns participant incentives with ecosystem growth.
- ✓ Protects liquidity depth during the early market phase.
- ✓ Provides predictable 4-month settlement through smart contracts.
- ✓ Keeps all settlements transparent and auditable on-chain.

STABILITY TODAY
STRONGER TOMORROW

UNCLAIMED & BURN MECHANISM

Any campaign allocation remaining **undistributed** after the completion of the 100-day campaign is **permanently burned**.

EXAMPLE:

$$\begin{array}{rclcl} 50\text{M} & - & 48.5\text{M} & = & 1.5\text{M} \\ \text{Allocated} & & \text{Distributed} & & \text{Permanently Burned} \end{array}$$

In addition, following the official PancakeSwap listing, 100% of all campaign-distributed tokens are **permanently burned** immediately after each participant's locked value has been recorded on-chain.

Future settlement releases are then funded from the **Product & Subscription Distribution Reserve**, while participant value remains protected.

COMMUNITY PARTNER PROGRAM

Oracle Lab platform subscribers automatically qualify for campaign participation.

Allocation is determined by subscription tier, campaign phase, and reward multiplier.

Every allocation is permanently recorded on-chain with a transparent audit trail.

This creates a disciplined, institution-grade framework that rewards genuine participation while **protecting circulating supply**.

FAIR. TRANSPARENT. SUSTAINABLE.
Built on Trust. Secured by Blockchain.

4% MARKETING

(40M OLAIN ORACLE LAB AI NETWORK)

Marketing Philosophy & Allocation Strategy:

Rather than aggressive paid campaigns, OLAIN ORACLE LAB AI NETWORK focuses on **product-led growth** where user adoption is driven by utility, education, partnerships, and community engagement. Resources are allocated strategically to maximize **measurable impact** while maintaining financial discipline.

PRIMARY MARKETING OBJECTIVES

Global brand awareness & thought leadership positioning

Community development & ecosystem engagement

Educational campaigns (academy, webinars, documentation)

Strategic partnerships (enterprise, exchanges, platforms)

Regional expansion into emerging markets

Enterprise outreach & institutional adoption

Digital ecosystem growth & platform integration

EXECUTION & PERFORMANCE

1 TOKEN GENERATION EVENT (TGE) 10% RELEASE (4M OLAIN ORACLE LAB AI NETWORK)

Immediate deployment for launch momentum across five priority areas:

- Brand launch & institutional positioning
- Community building & Discord/Telegram activation
- Initial awareness campaigns (paid + organic)
- Exchange & institutional partnership announcements
- Product launch activities & platform onboarding

2 POST-TGE GROWTH 90% OVER 36 MONTHS

Monthly Allocation

~1.1M OLAIN ORACLE LAB AI NETWORK per month for sustained growth

Performance Requirement

5:1 ROI minimum (5 users per \$1 spent)

Measurement

All campaigns evaluated using measurable KPIs; governance vote can adjust budget based on performance

DISCIPLINED SPENDING

MEASURABLE IMPACT

COMMUNITY FOCUSED

GLOBAL GROWTH

GOVERNANCE OVERSIGHT

Smart Allocation. Measurable Impact.
Real Growth. Sustainable Future.

www.olain.net

2% ADVISORS

(20M OLAIN ORACLE LAB AI NETWORK)

ADVISOR ROLE & EXPERTISE

This allocation reserves tokens for **experienced professionals** providing specialized knowledge to support long-term ecosystem development.

ADVISORS CONTRIBUTE GUIDANCE ACROSS STRATEGIC AREAS:

BLOCKCHAIN
INFRASTRUCTURE

TGE OVERVIEW

TOKEN GENERATION EVENT DETAILS

METRIC		VALUE
	Launch Date	Month 1 (Post-Announcement)
	Launch Platform	PancakeSwap (BNB Chain)
	Initial Price	\$0.06
	Initial Supply Released	52M OLAIN ORACLE LAB AI NETWORK (5.2% of 1B)
	Initial Market Cap	\$3.12M
	ALLOCATION AT TGE:	
	• Staking/Rewards	30M (7.5% of total supply)
	• Strategic Partners (Tier 1)	3M (10% of 30M)
	• Marketing	4M (10% of 40M)
	• Advisors	0M (0% - vesting begins after 3 months)
	• Airdrop Phase 1	5M (Phase 1 only)
	• Ecosystem Growth	5M (4.5% of 110M)
	• DEX Liquidity	5M + \$300k USDT paired
	• Core Team	0M (12-month cliff, no TGE release)
	• Treasury Reserve	0M (24-month lock)

ROADMAP (FIRST 24 MONTHS)

	MONTH 1	TGE @ \$0.06; ~53M circulating supply; PancakeSwap launch (Oracle-exclusive DEX access)	PRICE \$0.06
	MONTH 3	10k users target reached; Academy beta live	TARGET 10K USERS
	MONTH 6	30k users; CEX readiness (Binance/Kraken prep); Price targets \$0.15-\$0.25	PRICE TARGET \$0.15 - \$0.25
	MONTH 12	50k users; \$500k+ monthly revenue (\$6M+ annual); DEX opens public + Multi-DEX expansion; Price \$0.28+	PRICE \$0.28+
	MONTH 18	75k users; Strategic acquisitions begin; Price \$0.35-\$0.40	PRICE TARGET \$0.35 - \$0.40
	MONTH 24	Treasury lock expires; Price \$0.45-\$0.50+	PRICE TARGET \$0.45 - \$0.50+

ORACLE COMMUNITY: EXCLUSIVE DEX SELLING (MONTHS 1-12)

DEX ACCESS FRAMEWORK

During the first 12 months, DEX selling access is restricted to Oracle/subscription community members only. This mechanism prevents panic dumps from external speculators while allowing the committed community to manage their holdings.

ACCESS RIGHTS (MONTHS 1-12)

USER TYPE	DEX ACCESS	CAN SELL	CAN BUY	PURPOSE
 Oracle/ Subscription Community	 Full access	 YES (rewards + earned tokens)	 NO (from other community members)	Early builders, product users, governance participants
 Outsiders/ Non-Subscribers	 Blocked			Cannot participate until Month 12
 Rewards/ Earned Tokens	 Always tradeable	 YES (no restrictions)	 YES (open to all)	Cashback, community building incentives tradeable by everyone

WHY THIS WORKS

MECHANISM	BENEFIT	RESULT
 Oracle Community Can Sell	Early supporters can take profits on earned rewards	No forced lockup = reduces resentment, maintains engagement 
 Outsiders Can't Access DEX	Speculators blocked from panic-selling	Price stability + organic growth trajectory 
 Rewards Freely Tradeable	Everyone can sell earned tokens anytime	Liquidity maintained, no sudden supply shock 
 12-Month Exclusive Window	Community proven committed, project matured	New buyers at Month 12 enter a proven ecosystem, not speculation 

PROTECTS PRICE

EXAMPLE: ORACLE COMMUNITY MEMBER (MONTHS 1-12)

MONTH
1

MONTH 1:

- Joins Oracle community, gets DEX access
- Earns \$50 subscription value back from subscriptions
- Can SELL subscription-value rewards immediately ✓
- Position secured + earning yield
- No lockup required

MONTH
6

MONTH 6:

- Accumulated \$400 in earned rewards
- Price up from \$0.06 → \$0.20 (3.3x)
- Can sell earned rewards for \$1,200 profit anytime ✓
- Original position still growing
- Outsiders still blocked from DEX = no dump risk

PRICE
\$0.06 → \$0.20
3.3x
GROWTH

EARNED REWARDS
\$1,200
PROFIT

MONTH
12

MONTH 12:

- Earned \$1,200 total in rewards
- Can trade freely on DEX with other community members ✓
- Price \$0.28 (4.7x from launch)
- Position worth \$2,800+ (unrealized gains)
- DEX opens to public (governance vote approved)
- Oracle community receives "Founding Member" NFT badge
- Price target range \$0.35-\$0.40 (5.8-6.7x gains)
- Lifetime governance voting boost granted

PRICE
\$0.28
4.7x
FROM LAUNCH

POSITION WORTH
\$2,800+

MONTH 12: THE PUBLIC DEX OPENING

When DEX opens to public at Month 12,
three milestones align:

1 ECOSYSTEM PROOF (REAL DATA)

50k+
active users
(product-market fit confirmed)

\$500k+
MRR
(sustainable revenue model operational)

190
Governors voting
(decentralization tested)

2 TEAM CREDIBILITY

Core team vesting cliff complete
(12 months proven commitment)

Strategic partners on track with KPIs
(accountability verified)

Zero exits = institutional confidence

3 PUBLIC READINESS

Governance vote required:
66% supermajority approves public opening

Marketing campaign:
“DEX Now Open to Global Community”

Price discovery:
Market sets true valuation on public participation

WHY OUTSIDERS WAIT UNTIL MONTH 12

1

PROOF OF CONCEPT

Real users, real revenue,
no ponzi signals

2

TEAM VERIFIED

12 months showing
team won't exit or
abandon project

3

GOVERNANCE TESTED

DAO structure
proven operational
in live conditions

4

LOWER RISK

Can observe 12
months of data before
capital commitment

5

QUALITY CULTURE

Only serious builders
participated early =
better community

COMPETITIVE ADVANTAGE VS OTHER TOKENS

PROJECT TYPE	PROBLEM	OLAIN ORACLE LAB AI NETWORK SOLUTION
 TYPICAL TOKEN (PUBLIC DEX DAY 1)	Pump-and-dump whales dump immediately after launch	Oracle-exclusive access prevents dumps, builds real community
 PRESALE TOKEN	Founders & whales dump on retail	Community earns from product, truly aligned incentives
 AIRDROP TOKEN	Free distribution = massive inflation + immediate sellers	OLAIN ORACLE LAB AI NETWORK rewards real users only, commitment-based
 DAO TOKEN	Governance only, no natural price discovery	OLAIN ORACLE LAB AI NETWORK combines governance + liquidity + revenue-sharing
 OLAIN ORACLE LAB AI NETWORK ADVANTAGE	Exclusive → Public at maturity	 BEST OF BOTH WORLDS

4. GOVERNOR SYSTEM (190 MEMBERS)

TIER STRUCTURE (GOVERNANCE RIGHTS INCREASE)

TIER	OLAIN ORACLE LAB AI NETWORK STAKE	VOTING POWER	BENEFITS	REQUIREMENTS
Silver	10k	1x	Basic voting	Stake 10k, lock 1 year
Gold	50k	5x	Voting + proposals	Stake 50k, lock 2 years
Platinum	100k	15x	+ Council eligibility	Stake 100k, lock 3 years
Diamond	250k	50x	+ Emergency votes	Stake 250k, lock 4 years
Founder	500k	50x	Maximum power	Strategic partners

TOTAL COUNCIL: 190 GOVERNORS = 215x COMBINED VOTING POWER
(DISTRIBUTED, NOT CONCENTRATED)

BECOMING A GOVERNOR (7-STEP PROCESS)

GOVERNOR BENEFITS

Participation-based staking reward boosts

Voting rights on protocol decisions

Priority access to new products and partnerships

Exclusive community access through Discord and monthly calls

Public recognition and governance NFT badge

EXIT FRAMEWORK (IF GOVERNOR SELLS STAKE)

DURING LOCK:
Position forfeited, voting power removed

AFTER LOCK EXPIRES:
Can exit anytime

NOTE:
Vesting tokens remain locked per original schedule (selling position doesn't unlock vesting)

190
GOVERNORS

DISTRIBUTED
POWER

SECURE
GOVERNANCE

LONG-TERM
VISION

STRONG
ECOSYSTEM

Govern. Decide. Build the Future.
Power in Community. Trust in Governance.

www.olain.net

5. ECONOMIC MODEL & BURN MECHANISM

THREE BURN SOURCES

1

SUBSCRIPTION REVENUE BURN (PRIMARY)

- 50% DEX market buyback + 50% allocation release = permanent burn
- Scales with user growth

REVENUE DRIVEN

SCALES WITH USER GROWTH

2

GOVERNANCE-CONTROLLED BURN (SECONDARY)

- Holders vote to burn excess allocation tokens
- 30-day discussion + 7-day vote + 48-hour timelock

COMMUNITY DECIDES

GOVERNANCE PROCESS

3

STAKING REWARD BURN + DISCOUNT BURN (TERTIARY)

- 3% quarterly burn from staking pool
- 100% burn of discounted OLAIN payments for subscriptions or API packages
- Equivalent USDT value added to liquidity through the protocol-funded liquidity model
- Automatic, no governance needed

AUTOMATIC BURN

NO GOVERNANCE REQUIRED

REVENUE MODEL & PRODUCTS

• CORE PRODUCTS •

1

ORAMIND

Intelligent chain-building AI agent

2

ORACLE LAB

AI-powered agent development environment

3

VERIVault

Decentralized document verification & secure storage platform

4

CHAIN CIRCLE LINK

Community infrastructure & ecosystem services

• PRICING MODEL •

BUSINESS STARTUP SUBSCRIPTION
\$399 / year

PLANNED API PACKAGE
\$899 / year

PAY WITH USDT
Full Price

PAY WITH OLAIN
50% Discount

DISCOUNTED PAYMENT BURNED 100%
100%

The equivalent USDT value is added to liquidity through the protocol-funded liquidity model.

This creates sustainable demand, reduces supply, and strengthens long-term token value.

DEFLATIONARY BY DESIGN

SUSTAINED VALUE GROWTH

COMMUNITY GOVERNED

TRANSPARENT & AUDITABLE

LONG-TERM ALIGNMENT

Utility Drives Demand.
Burn Drives Value. Community Drives Future.

www.olain.net

SUBHEADING

ILLUSTRATIVE SUBSCRIPTION-TO-BURN SCALING MODEL

The following framework is included as an **illustrative economic model** rather than a price forecast. It demonstrates how recurring subscription demand can support long-term scarcity, liquidity depth, and protocol sustainability without relying on extreme token emission or short-term speculative pressure.

ASSUMPTIONS USED FOR ILLUSTRATION

Business Startup
Subscription

\$399/year

OLAIN payment
receives a

50%
discount

The discounted
payment is

100%
burned

The equivalent
USDT value is

added to
liquidity

Token valuation is
assumed at

\$10 for the
example below

 ANNUAL USERS	 REVENUE (USDT)	 LIQUIDITY ADDED	 TOKENS BURNED	 SUPPLY REMAINING
10,000	\$3.99M	\$1.995M	199,500	999.80M
50,000	\$19.95M	\$9.975M	997,500	999.00M
100,000	\$39.90M	\$19.95M	1.995M	998.01M
250,000	\$99.75M	\$49.88M	4.99M	995.01M
500,000	\$199.50M	\$99.75M	9.98M	990.03M
1,000,000	\$399.00M	\$199.50M	19.95M	980.05M

WHAT THIS MEANS

- ✓ At \$10 per token, the burn becomes **slow and sustainable** rather than aggressive or destabilizing.
- ✓ 1 million annual subscribers would burn only **~2% of total supply**, while simultaneously adding nearly **\$200M** of liquidity support.
- ✓ As the token price rises, each subscription burns fewer tokens than it would at a lower price, making the deflationary mechanism **more durable over time**.

SUSTAINABLE
SCARCITY

LIQUIDITY
DEPTH

PROTOCOL
SUSTAINABILITY

REAL DEMAND
DRIVEN

LONG-TERM
VALUE

Utility Creates Value.
Burn Creates Scarcity.
Together They Build the Future.

www.olain.net

EXAMPLE

EXAMPLE IF PRICE KEEPS INCREASING

 TOKEN PRICE	TOKENS BURNED PER BUSINESS SUBSCRIPTION 
\$0.06	→ 3,325 OLAIN
\$0.50	→ 399 OLAIN
\$1.00	→ 199.5 OLAIN
\$5.00	→ 39.9 OLAIN
\$10.00	→ 19.95 OLAIN
\$25.00	→ 7.98 OLAIN
\$50.00	→ 3.99 OLAIN
\$100.00	→ 1.995 OLAIN

This demonstrates the **self-adjusting nature** of the model: as token price increases, each subscription removes fewer tokens from circulation, helping the remaining supply last longer while preserving a stable and recurring utility-driven demand loop.

INSTITUTIONAL INTERPRETATION

IMPORTANT CAUTION

Burning and adding liquidity alone do not guarantee price appreciation. Long-term price performance depends on **sustained demand, product adoption, recurring renewals, market conditions, and disciplined treasury management.**

The burn mechanism can reinforce scarcity, but adoption remains the primary driver of value.

Utility Creates Value. Burn Creates Scarcity.
Together They Build the Future.

www.olain.net

6. KEY PERFORMANCE INDICATORS

(MONTH 12 GATE STRUCTURE)

METRIC	MONTH 3	MONTH 6	MONTH 9	MONTH 12 READINESS GATE
 ACTIVE USERS	10k	30k	50k	75k
 MONTHLY REVENUE	\$50k	\$250k	\$500k	\$750k
 MONTHLY BURN	0.5M	2.5M	5M	7.5M
 COMMUNITY SIZE	50k	150k	250k	400k
 GOVERNOR VOTES (% OF ELIGIBLE)	20%	30%	40%	50%+

Month 12 Readiness Gate:

Public DEX opening requires 50k+ active users and \$500k+ monthly revenue.

CEX unlock is a stricter gate and requires 75k+ active users, \$750k+ monthly revenue, a completed audit, and 50%+ governor participation.

SUCCESS TRIGGERS FOR CEX UNLOCK

- ✓ 75k+ active users
- ✓ \$750k+ monthly revenue
- ✓ 50%+ governor vote participation on proposals
- ✓ Smart contract audit passed
- ✓ Team cliff reached (institutional comfort)

FAILURE TRIGGERS (HALT CEX UNTIL FIXED)

- ✗ Users < 75k at Month 12
- ✗ Revenue < \$750k MRR
- ✗ Governor participation < 40%
- ✗ Team member exits without replacement (within 30 days)

STRONG METRICS. REAL GROWTH.
SUSTAINABLE VALUE. GLOBAL IMPACT.

www.olain.net

7. GROWTH ROADMAP

A clear path to mass adoption, sustainable growth and institutional recognition.

PHASE 1

FOUNDATION (MONTHS 1-3)

- ✓ DEX Launch (PancakeSwap)
- ✓ Academy beta + 10k users target
- ✓ Governor system activation
- ✓ Community building

PHASE 2

SCALING (MONTHS 4-12)

- ✓ Multi-DEX expansion and public liquidity growth
- ✓ Marketplace launch
- ✓ Reach 50k users + \$500k MRR for public DEX opening
- ✓ Governance proven functional
- ✓ Complete CEX readiness review, with actual exchange launches scheduled only after the stricter Month 12 gate is met

PHASE 3

INSTITUTIONAL (MONTHS 13-18)

- ✓ Achieve 75k+ users + \$750k+ MRR (CEX readiness gate)
- ✓ Cliff Completion (Month 12): Team vesting unlocks (institutional trust proven)
- ✓ Execute Tier 2 CEX listings and public DEX liquidity expansion immediately after Month 12

PHASE 4

EXCHANGE LAUNCH & GLOBAL EXPANSION (MONTHS 12+)

- ✓ Accelerate Tier 1 exchange listing execution following a successful Month 12 readiness gate
- ✓ MEXC/Kucoin/Bybit listings (requires community governance approval + \$5-10M liquidity)
- ✓ Expand into USA and other strategic markets after Month 18 momentum

**STRONG ROADMAP.
REAL GROWTH.
SUSTAINABLE FUTURE.**

www.olain.net

8. RISK MITIGATION

RISK	MITIGATION
 TREASURY DUMP	30-day discussion + 7-day vote + 48-hour timelock = community can organize opposition
 TEAM RUG PULL	12-month cliff + 36-month linear vesting = long-term alignment
 LOW LIQUIDITY	\$600k initial LP + 5-year lock + multi-DEX expansion + protocol-funded liquidity injection from burned discounted OLAIN payments = deep, stable markets
 GOVERNANCE CENTRALIZATION	190 governors with 215x distributed voting = 66% supermajority required = consensus-based
 REGULATORY UNCERTAINTY	Multi-jurisdiction compliance + tax reporting ready = institutional-grade structure
 LOW ADOPTION	40% allocation to rewards + cashback + loyalty programs = incentive-aligned growth

WHY OLAIN ORACLE LAB AI NETWORK WORKS

- 1 Product-First:** Revenue comes from real users, not speculation
- 2 Deflationary:** Supply decreases as demand increases (inverse token economics)
- 3 Transparent:** Every transaction on public blockchain, every decision voted on
- 4 Long-term Aligned:** Team locked 48 months, partners locked 18m, community voting on spending
- 5 Scalable:** Burn mechanism increases automatically with revenue (no manual governance needed)
- 6 Institutional:** Audit-ready, compliance-complete, exchange-proven structure

NEXT STEPS

A clear, strategic roadmap to achieve sustainable growth and global impact.

MONTH
1

DEX LAUNCH + AUDIT COMPLETION

Launch on PancakeSwap and complete smart contract audit.

MONTH
3

REACH 10K USERS, ACTIVATE GOVERNANCE

Grow the community to 10,000+ active users and activate the governor system.

MONTH
6

REACH 30K USERS, COMPLETE CEX READINESS REVIEW

Scale adoption to 30,000+ users and complete the CEX readiness review process.

MONTH
12

REACH 50K USERS + \$500K MRR, PUBLIC DEX OPENING, MULTI-DEX EXPANSION, AND GOVERNANCE-BASED CEX READINESS CHECKPOINT

Achieve key milestones, open public DEX access, expand to multiple DEXs, and complete governance-based CEX readiness checkpoint.

MONTH
13+

BEGIN TIER 1/TIER 2 CEX LISTINGS

Execute CEX listings only after liquidity, governance, and audit thresholds are met.

MONTH
24+

500K USERS, \$10M+ MRR, GLOBAL EXPANSION

Scale globally with a strong ecosystem, growing revenue, and real-world impact.
